### DETAILED ACTION

Claims 1-4, 6, 8-13, 15-20 and 22-27 are pending in this application. Claims 7, 14 and 21 stand withdrawn from consideration. Claims 22-27 are newly added.

This application contains claims 7, 14 and 21 drawn to an invention nonelected with traverse in Paper No. 7. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Applicant's arguments filed 3/8/04 have been fully considered but they are not completely persuasive. Any rejections not repeated below have been withdrawn.

Claims 1-4, 6 remain rejected and new claims 22-27 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. *To the extent this rejection is newly applied, it is necessitated by Applicant's amendments.*

Applicant has amended claim 1 to recite a display of the calculations. Such a display does not render a data value concrete tangible and useful according to the standard. Similarly, the final step of claim 22 does not end in a result that is immediately concrete, tangible and useful. Methods which produce a result that have been shown to meet the standard include methods that result in a dollar value, a yes/no answer, or a buy/sell recommendation.

These claims merely analyze the evolution of a system and do not end with a specific concrete diagnosis, prediction or other result that is immediately concrete, tangible and useful. MPEP 2106: "For such subject matter to be statutory, the claimed process must be limited to a practical application of the abstract idea or mathematical algorithm in the technological arts. See *Alappat*, 33 F.3d at 1543, 31USPQ2d at 1556-57 (quoting *Diamond v. Diehr*, 450 U.S. at 192, 209 USPQ at 10). See also *Alappat* 33 F.3d at 1569, 31 USPQ2d at 1578-79 (Newman, J., concurring) ("unpatentability of the principle does not defeat patentability of its practical applications") (citing *O'Reilly v. Morse*, 56 U.S. (15 How.) at 114-19). A claim is limited to a practical application when the method, as claimed, produces a concrete, tangible and useful result; i.e., the method recites a step or act of producing something that is concrete, tangible and useful. See *AT & T*, 172 F.3d at 1358, 50 USPQ2d at 1452. Likewise, a machine claim is statutory when the machine, as claimed, produces a concrete, tangible and useful result (as in

Art Unit: 1631

State Street, 149 F.3d at 1373, 47 USPQ2d at 1601) and/or when a specific machine is being claimed (as in Alappat, 33 F.3d at 1544, 31 USPQ2d at 1557 (in banc))."

### ***Conclusion***

Claims 8-13 and 15-20 are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
